Personal Summary

Proactive Systems and Computer Engineer with a strong interest in software development and modern technologies.

Highly motivated to continuously learn, adapt to industry standards, and contribute to high-quality technical solutions while growing professionally.

Passionate about technology communities, open-source software, and event organization.

Education

Universidad Tecnológica de Pereira, in Bachelor's in Systems and Computer Engineering – Pereira, Colombia — Feb 2020 – July 2025

- Participation in different events of the Regional Network of Research Seedbeds with SONAR I.S.C, a software quality research seedbed led from 2022 to 2024.

Experience

Distribution Engineer, Dailybot – Remote — June 2026 – Aug 2026

- Developing and maintaining the distribution system for the Dailybot platform and related projects, ensuring efficient and reliable delivery of products and their updates to customers.
- Collaborating on the general development of the Dailybot platform and related projects, ensuring the delivery of high-quality features to customers.

Mobile Developer, JUAN FERNANDEZ T.A.E. – Remote — Aug 2025 – June 2026

- Continuing development of a cross-platform fitness application using Flutter, delivering a consistent and high-performance experience on both iOS and Android.
- Integrating application with Firebase services for authentication, messaging, and cloud storage, enhancing user engagement and data management.
- Collaborating on functional requirements and UX decisions to align technical implementation with user needs and business goals.

Fullstack Developer, Webspro – Pereira, Colombia — Dec 2024 – Aug 2025

- Adapted and deployed Unity projects to WebGL, integrating them with React-based web applications.
- Developed RESTful APIs with FastAPI, ensuring performance, scalability, and clear documentation.
- Managed backend services with Supabase, including authentication, database design, and access control.
- Led development teams, coordinating tasks, and ensuring project delivery.

Projects

PR Extractor — 2026 – present

Legendary Pokedex API — 2026 – present

pereiratechtalks.org — 2025 – present

Skills
